### LIBRARY REPORT

---

The former librarian resigned in July 1945, and Mrs. Adele Taylor was appointed to fill the vacancy.

A set of Compton's Childrens' Encyclopedias has been brought and are on the shelves.

The Book Committe plans to order books four times each year, and patron's requests are considered when ordering books. Due to war time restrictions of paper, books are of finer print, and therefore some find them harder reading and so prefer the old books.

A great deal of interest has been experienced in the last year in the Church reading list.

Over 400 books were read by 45 readers and nearly all books were borrowed from this library. Children are especially interested in reading Church list books, which assures them of fine reading.

Books are borrowed by request from the N. H., State Library and the Extension Division. The Bookmobile stops several times yearly and books are borrowed to supplement those which we already have.

Books have been presented by Robert Forbes, Mrs. Arthur Brown and Marion Goodwin, for which we are most grateful.

The circulation of books from January 1, 1945 to December 31, 1945, is as follows:

Adult Fiction	1232
Non-fiction	302
Children's	600
Magazines	273

Library hours are: — Wednesday 3—5 7—8  
Saturday — 2—4 7—8

### PREVENT FOREST FIRES—IT PAYS

---

An average of 7,300 acres of woodland are burned over by forest fires in New Hampshire each year destroying many thousand dollars worth of property of all description. It costs many additional thousands of dollars and requires valuable man hours, taken from other essential work, to extinguish them. These losses affect the personal fortunes of the owners, and town and state economies. Everyone loses because of them.

Analysis of fire causes reveals the fact that more than 98 percent of all forest fires are, consistently, the result of human carelessness and are preventable!

We have been extremely fortunate during the past few years. Favorable fire weather and war time restrictions on travel which kept people off the highways and out of the woods have aided materially in reducing fire risks, keeping fires fewer and fire losses low.

We now face changed conditions. People can travel freely. Their love for travel and the freedom of the woods will bring them out in ever increasing numbers. This will step up the fire risks materially. The accelerated cutting of the war years has resulted in additional thousands of slash acres. These factors, combined with a possible dry season and human carelessness could easily produce a catastrophe. Everyone must, consequently, be on his guard. He should

1. Be careful with fire or when smoking in or near woodlands.
2. Cooperate with the local forest fire warden and his deputies by

## TOWN OF MOULTONBORO

---

- a. Abiding cheerfully with whatever restrictions it may be necessary to impose. They are intended only to be helpful.
- b. Securing permits to burn debris when the ground is not covered with snow.
- c. Seeing that others comply with the requirements.
- d. Promptly coming to the warden's assistance when needed.

If these few fundamental practices are followed it will be possible to PREVENT a large proportion of FOREST FIRES from starting—that PAYS!

### SCHOOL NURSE REPORT

---

School Visits	71
Pupils Inspected	69

Dr. R. J. Turley did the physical examinations on the children in the Grammar, Primary and Greene's Corner schools. Dr. L. B. Morrill did the physicals on the Moultonboro children in the Center Harbor school.

Result of examination:

Defective teeth	13
Defective vision	6
(three have been corrected)	
Enlarged tonsils	3
Cardiac condition	1

A tuberculosis skin test clinic sponsored by the New Hampshire Tuberculosis Association was held on October 1st. Of the seventy four pupils tested, we are pleased to report that we did not have one positive reaction.

A new telebinocular for measuring vision was used with very good results.

It has been very difficult this year to make any appointments for school children, due to war conditions.

I again wish to express my appreciation to the Red Cross, the Superintendent, the School Board and teachers for their cooperation at all times.

Respectfully submitted,

EVA A. HENEY, R. N.

### REPORT OF THE SUPERINTENDENT OF SCHOOLS

---

The calendar year 1945 has seen history made more rapidly than ever before. Events of deep meaning for the future have followed one another with breathtaking speed. It will be a long time before we fully realize the significance of the great war that has now come to an end; of the release of the new power known as atomic energy; and of the vast political enterprise now barely begun, called the United Nations.

Children in our schools and homes must come to think of themselves not only as citizens of New Hampshire, not only as Americans, but also as citizens of the world. Sympathy and friendship are not to stop in a neighboring county, nor even in a distant state like Texas or California; they must reach likewise to Burma, Siberia, and the Congo Region. Just as Hitler used the schools to develop fanatical hatred to vast destructive ends, so we must use them to indoctrinate children throughout the world with the idea that we can all get along together like good neighbors.

Such an attitude of world-neighborliness can be developed only as teachers and parents will come to realize the importance of it, and as they learn to develop broader tolerance in their own hearts. To develop world-neighborliness, schools need gradually to replace old geographies and histories with new texts of broader outlook; and until such books are available, teachers must try to interpret the lessons in our present books in such a way that pupils will come to see their relationship to the rest of the world.

The war has also taught us other lessons about education. It has proved, through experience in army camps, that young people can learn much faster and more effectively than they are in the habit of learning. It has shown

## TOWN OF MOULTONBORO

---

that our traditional methods of teaching can be greatly speeded up if necessary, and has demonstrated the value of moving pictures, still pictures, and other modern devices that give children a clearer understanding of what they read and recite about. And it has brought vividly to our consciousness the need for more thorough and complete training in health and physical education.

These are just a few of the important lessons we should have learned in 1945. Let us try to profit by them in 1946, and in the years ahead.

Respectfully submitted,

ALMON W. BUSHNELL.
